Introduction of CJ Larkin

The letter that was sent to each politician was reread and they had a chance to answer several questions: Exposure to children, chronic health exposure, NPL/ Superfund and economic resources. A717

Abel: Reduce exposure, cont. testing, information has been made available as well as technology to reduce emissions, Superfund has a stigma, need to find a way to diversify community, 15% of school revenue comes from Doe Run.

Carnahan: Access to federal programs and dollars, lead poisoning has occurred, wants NPL listing.

Rauls: Will try to give support, Need to diversify economic base in the county.

Stoll: Agencies are on the right track, wants compliance with the clean air act, wants to help the plant become compliant, help citizens to feel safe, communication between all parties, accurate information, work with the people in the buyout area, school foundation formula, TIF laws and is always looking for new business.

Lamping: Concerned, we must decide what Herculaneum wants, Industrial property.

Health Department:

- Please continue to send in the registry of citizen's form that was sent.
- Health consultation revealed students and staff have no apparent public health hazard.
- Money is available for MS study.
- Community wide screening event in September.

EPA

- 100 soil replacement completed, 68 home interiors cleaned 37 vacuum certificates issued by EPA.
- The site goals are Unchanged for the moment
- First quarter air data---All monitors met the standard, April 2002 Broad street monitor at 3.58. All other monitors averaged below 1.0. Must average below 1.5 for the quarter.
- Exterior Recontamination- 18 residences are having their soils sampled on a monthly base. No significant recontamination being found.
- Interior Recontamination sampling- 12 homes, Carpets have show up to 3,300ppm after cleaning, further action is needed.

DNR

-No issues with after hours plant inspections
